EXPERIENCE

Tech Lead

Global Work and Travel

📅 2020 – Present   📍 Remote

- Worked as a tech lead rewriting a legacy customer dashboard while documenting the old flows and assuring a smooth transition (NextJS, Serverless, N8N, LaunchDarkly, Stripe)
- Lead and developed a job search platform (GraphQL, NextJS, React Native, Hasura, PostgreSQL, Serverless)
- Designed and maintained a micro front-end architecture to let Angular, AngularJS and React to run together to be able to migrate a legacy project gradually to newer technologies (Single-SPA)
- Designed CI/CD processes and pipelines (AWS, Bitbucket, Gitlab, bash, Docker, ESlint, Mocha)
- Developed data-intensive dashboard for monitoring services and diagrams for visualizing their dependencies (NextJS, D3, Typescript, Gitlab and BitBucket API)
- Designed microservices and serverless architectures (AWS, REST on Express/Node, GraphQL)

Front-End Developer

Dark POS

📅 2017 – 2019   📍 Remote

- Planned and developed a multi-branded testable offline-first progressive web application (React, Redux, GraphQL, Jest, Electron)
- Developed a system to auto-generate documents from multiple codebases (Python, mkdocs, Docker, Gitlab CI/CD)
- Maintained an active large code base with a fully remote team and facilitated the team as the lead developer

Mobile and Web developer

Karapost

📅 2014 – 2016   📍 Remote

- Developed mobile and web applications for automating different business routines inside company (React, React Native)
- Developed nation-wide monitoring platform for tracking the postal packages and informing customers

Full-stack Web Developer

Jooyeshgar

📅 2013 – 2014   📍 Esfahan, Iran

- Developed CRM and financial reporting platform, from data entry to data warehouse (PHP, MySQL)
- Developed web-based accounting solutions for connecting nation-wide companies.
